

AQUOLAC PAINTS

AQUOLAC CEMENT PRIMER (Water Base)

Aquolac Cement Primer is a scientifically formulated water Thinnable product having excellent adhesion of Cement Paint to the surface. It is manufactured with water soluble Resins and other selected raw materials. Practically it provides Rock Hard Bonding of the material to the surface. It is most useful for remedying improper bonding due to its plasticity. It can be used for surfaces to be painted with Cement Paints, Dry Distemper or Lime Wash. It enhances the life of surface and Painting material.

Application : Aquolac Cement Primer is well mixed and applied by brush after cleaning the surface properly. It can also be applied on Brick surface, Cement / Sand/Lime/renderings and asbestos sheets.

Packing : It is available in 30 Ltrs. & 5 Ltrs. PVC jerry cans
