

AQUOLAC PAINTS

SILCOAT Colourless Water Repellant Compound

Silcoat is a specially formulated Silicone based colour less water repellant compound based on latest international technology. It protects masonry from corrosion and dampness in all weathering conditions.

Uses : Concrete, Stones

Application : Brush / Spray

Drying Time : It builds an invisible film after 24 hours drying which keeps the water on the run, thus protecting the masonry from cracking peeling , chalking and from fungus and algae growth.

Covering Capacity : Normally it covers 125 – 150 ft / Ltr. as per porosity of surface.

Packing : 5 Ltrs., and 20 Ltrs.
